SOVAH HEALTH MARTINSVILLE NEWS + FALL 2020

YOUR HEALTH. OUR HEROES.

A Glimpse at How We're Working to Keep You Safe

By BRUCE MAZUREK, MD, MARKET MEDICAL DIRECTOR, EMERGENCY SERVICES

As healthcare providers, the wellbeing of our patients is our top priority every day of the year. When it comes to caring for you during a pandemic, that doesn't change. In fact, as we continue to fight COVID-19 and navigate our "new normal," we have

taken a number of important steps to ensure that we can continue to provide the quality care you have come to trust in an environment that is safer than it has ever been.

Ask a Doc

**Sheranda
Gunn-Nolan, DO**
Market Chief
Medical Officer,
Sovah Health

QUESTION: *My child's school year is not beginning in person. Does he/she still need an annual physical and immunizations check?*

ANSWER: Yes. Well visits are an essential part of keeping your child on the road to good health. They allow your child's pediatrician to conduct a full evaluation, monitor your child's growth and developmental milestones, ensure that they are up-to-date on immunizations,

answer any questions you may have and spot any potential health issues before they become serious. In fact, now is a great time to schedule your child's annual visit. Pediatrician offices are taking extra precautions to protect everyone's health and safety, and your child's doctor may

A note from the CEO

When 2020 began, no one could have predicted the journey we have found ourselves on over the last several months. The emergence of COVID-19 has created unprecedented challenges for our community and caused each of us to rethink how we do everything – from traveling and socializing with friends and neighbors to completing everyday tasks like shopping for groceries.

At Sovah Health–Martinsville, I believe our fight against COVID-19 has made our team stronger, our hospital safer and our ability to care for you better than ever. This issue of *Making Communities Healthier* takes you inside our hospital for a look at what we are doing to keep our patients and guests safe when receiving care, offers some great tips on how you can help stop the spread of this disease, and much more!

From the beginning, our priority has been protecting the health of our community, our patients and our employees. And we will continue to work hard to ensure a safe place of care and a healthier community for all of us. ■

Sincerely,

Dale Alward, FACHE, MHA, MPA
CEO

As each of us does all that we can to stay safe and protect ourselves and our families, it has never been more important to stay on top of our health and seek the proper care when necessary. You may be wondering what receiving care in our facilities might look like right now. Read on to learn about all the ways we are working hard to keep you safe when you come visit us.

Safety and Cleanliness

Sovah Health–Martinsville has always been a clean and safe place to receive care. Effectively managing infectious diseases with proper sanitation and disinfection procedures has been and continues to be essential to ensuring a safe environment of care. Our environmental services team continues to implement effective cleaning and disinfecting practices throughout our hospital. When you come for care, you can rest assured that we are committed to maintaining high standards of cleanliness in all of our facilities.

Supplies and Staffing

Our clinical teams are constantly monitoring supplies like personal protective equipment (PPE), medications and blood, as well as evaluating space and staffing needs, to make sure we have what we need to care for all of our patients. This includes patients who are coming in for planned procedures, as well as those seeking emergency and potential COVID-19 care.

Screening

Everyone who enters our facility – from patients and guests to employees and medical staff – is screened for COVID-19 symptoms, in accordance with CDC guidelines. This practice, which includes conducting temperature checks and asking a series of questions, helps protect not only our patients but our staff as well.

Masking

In accordance with CDC and Virginia Department of Health recommendations, anyone who enters our facility must wear a face mask at all times. Just as we screen everyone who enters our facility, we also require that everyone, including patients, visitors and employees, wear a face mask at all times.

Updated Limited Visitor Policy

Out of an abundance of caution, we have put a limited visitor policy in place. To further ensure the safety of our patients and employees, those areas which are allowed visitors are allowed only one WELL visitor per day. For the most up-to-date detailed information, visit SovahHealth.com, go to the Community tab and click on Hospital News.

To read more about how we are keeping your safety a priority, visit SovahHealth.com and click on Coronavirus (COVID-19) Preparedness, located at the top of the page.

While COVID-19 is uncharted territory for our community, you can be confident that we are committed to providing a safe place to receive quality care when you need it, and we are continuing to seek ways to enhance your patient experience. ■

Mission Moment

Heather Ashe

DIRECTOR OF
PHARMACY

Heather Ashe has been with Sovah Health for 12 years. She goes above and beyond for her employees during COVID-19 by creating solutions to ensure her staff's

needs are addressed. She shows her true compassion by supporting her colleagues during difficult times and going out of her way to ensure patients receive quality care. Her leadership inside and outside of work makes her a true asset to our community. ■

DID YOU KNOW?

Sovah Health–Martinsville is grateful to call Martinsville, Henry County and the surrounding area home, and we take pride in not only creating a place where you choose to come for healthcare, but also in making a positive impact in our community. Here are just a few ways we made a difference last year.

We added 22 new providers and invested more than \$3 million in capital improvements to help ensure that we continue to provide access to quality care and meet your evolving healthcare needs.

We donated nearly \$25 million in charity care because we believe that delivering care to all of our neighbors – regardless of their ability to pay – is foundational to our mission of Making Communities Healthier.

We paid more than \$9 million in taxes because we take our role as a community leader seriously and are dedicated to ensuring fiscal responsibility both within and outside our hospital walls.

We distributed a payroll of nearly \$54 million to more than 720 employees as part of our commitment to creating places where physicians want to practice and employees want to work, and where their contributions are valued.

We supported a number of local organizations, including Boys & Girls Club of the Blue Ridge, Caring Hearts Free Clinic, Patrick County Fair and more, because, as leaders in our region, we are committed to helping our community grow and be the best it can be for all of us. ■

3 to Help Stay COVID-Free

Three simple actions to help stop the spread of COVID-19 and protect yourself, your family and your community

WASH YOUR HANDS

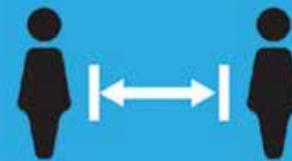

20 Seconds Minimum

Wash your hands frequently with soap and water for at least 20 seconds. If soap and water are unavailable, clean your hands with an alcohol-based sanitizer that contains at least 60% alcohol.

PRACTICE SOCIAL DISTANCING

6 Feet Minimum

Stay a safe distance – at least 6 feet apart – from others not in your household in both indoor and outdoor spaces. Six feet apart is about two arms' length.

WEAR FACE MASKS

For Everyone's Protection

Wear a face mask or cloth face covering that covers your nose and mouth in public spaces, even if you don't feel sick. Face masks and cloth face coverings can help protect others and prevent both asymptomatic and symptomatic spread of respiratory illnesses like COVID-19.

Meet Brandon Mullins, MD

Brandon Mullins, MD, is a new radiation oncologist who joined Sovah Ravenel Cancer Center. He came to Sovah Health from UNC Hospital where he completed his residency. Brandon and his wife, Britni, moved to Martinsville from Chapel Hill, NC. He and his wife are looking forward to getting to know the Martinsville Community. To make an appointment with a provider, call 844.GO.SOVAH. ■

Martinsville, Virginia 24112

Could your next doctor visit be virtual?

Since the start of the COVID-19 pandemic, many providers are using telehealth as a safe, convenient alternative to an in-person visit. Could a telehealth appointment be right for you?

Telehealth visits are most appropriate for more routine visits to the doctor – such as if you are fighting a cold or sore throat, or have a question about a rash. Like an office visit, you'll be able to ask a provider questions, receive quality care and a prescription for medication if appropriate – all from the comfort of your own home!

To schedule a virtual telehealth visit, call your provider to learn if telehealth is an offered option and appropriate for the nature of your visit. If your visit qualifies, your appointment will be scheduled and you will receive an emailed link to begin your visit when the time comes. All you will need is a computer or mobile device equipped with a camera.

Ask A Doctor

have a few more openings for these types of visits than usual. If your child does not have a pediatrician, call 844.GO.SOVAH to get them connected with the right care today.

QUESTION: *I have a chronic health condition. What should I be doing right now?*

ANSWER: It's important to stay in touch with your healthcare provider. Don't hesitate to call with any questions or concerns you may have. Keep your regularly scheduled appointments. If you are concerned about coming to the office, ask your provider about the potential for a telehealth visit instead of an in-person visit. Don't skip any doses of your medications, and make sure you have enough medications and other supplies on hand in case you need to stay home for an extended period of time. Above all, continue to stay on top of your health and do everything you can to protect yourself, including practicing good hand hygiene, staying at home as much as possible, wearing a face mask and social distancing when you need to get out. ■
