

FM RESIDENCY CLINIC

Our Family Medicine Residency Clinic services much of the surrounding community. Excellent family medicine preceptors teach residents about common outpatient conditions, procedures, and high-quality care. The continuity experience also includes geriatric, pediatric, and prenatal care training. Residents also learn how to navigate the complexities of the healthcare system and how to serve both insured and uninsured patient populations that benefit from the residency clinic services.

The new FM Residency Clinic boasts 14 exam rooms, including rooms dedicated to procedures, OMM, and care of pediatric patients. Resident work spaces have beautiful views of the scenic Dan River.
